Projects

Personal Website

March 2020 – April 2020

Objective: Using visual studio code to develop a personal website with certain components such as portfolio and case studies. Highly utilised the knowledge of **HTML, CSS, Sass, Flexbox, Javascript** to deliver the project.

Tools: **Visual Studio Code, Github**

Duties: The project is carried out individually. I was required to create a responsive website layout by using HTML, Sass, Flexbox and Bootstrap practices. I also needed to use Javascript to make the website interactive.

Result: Successfully host the website on my github page

Weather App

April 2020 – May 2020

Objective: Using React to develop a location-based weather forecast app with certain features to show current and future temperature based on different cities. Highly utilised the knowledge of **React.js, Sass, Flexbox, API** to deliver the project.

Tools: **Visual Studio Code, Github**

Duties: The project is carried out individually. I was required to use Javascript with React framework to create a simple weather forecast app. By using ajax to fetch weather data from OpenWeatherAPI and save them in the localStorage.

Result: Successfully host the app on my github page

Pizza Website

need to complete later

Employment History

Front-End Developer Intern

Sep 2018 – Dec 2018

Vessel Furniture Sydney NSW

- Contributed to the development of a new B2B website with improved functionality and customer satisfaction
- Communicated with users effectively, requested feedback and created a report based on user suggestions
- Involved in the UI interface design phase and used Invision platform to show interactive mockups
- Recruited web developers on freelancer website to assist the team with the project
- Delegated tasks to outsourced developers and checked their progress on the Agile platform, Asana and Jira

Juicer and Sales

Jan 2017 – Current

Top Juice Sydney NSW

- Attending carefully to customer needs and promoting the sale of products, developing excellent communication and negotiation skills
- Setting up sales targets for each month on the basis of the previous sales volumes to maximise the profit of the company
- Building a bond between colleagues and helping to foster a comfortable and harmonious workplace environment

- Working under pressure in a busy environment, learning how to priorities tasks

Personal Attributes

- **Communication Skills** – Developed ability to communicate clearly and effectively through different mediums, by email, on the phone, with text messages and with body language. Built up confidence and gained experience through presentations during my university studies.
- **Problem Solving** – Ability to discover new problems and make informed decisions effectively and swiftly. Confidence and experience using Agile methodology to provide solutions to clients during my internship.
- **Strong Learning Ability** - Demonstrated a strong motivation and high enthusiasm for learning new skills, software and technology related to web development. Achieved a High Distinction average for most programming-related subjects during my university studies. Love learning new things and being passionate on technologies
- **Ability to Work in a Team** – A strong team spirit and ability to brainstorm collectively and collaborate in a group setting. Worked with a team of three on a new web development at Vessel Furniture during my internship. Successfully deliver the mockups on time
